Made in Germany, designed in Austria

SHADEONE® Twister-Sail

So being outside feels like a vacation

SHADESIGN®

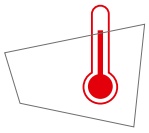
Passion for shade

V 1801.1

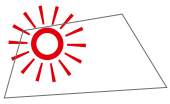
We want sun protection that fits us perfectly!

Shadesign develops innovative sun protection solutions which are of the highest levels of quality and design. On these pages, we present to you our SHADEONE® Twister-Sail. Simple to operate, the Twister-Sail lets you experience sun or shade whenever you wish.

All-year-round use

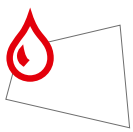


High UV Protection UPF 50+



Wind-dynamic through free-floating suspension

Rainproof, water runs off automatically from an inclination of 8+ degrees



Awnings were yesterday

SHADEONE® harmonises with the architecture of every building. With its minimalist design and free-floating sail membrane, the Twister-Sail adds a visual highlight to every façade. The system enables a total screen area of an impressive 34.5 m^2 and compared to awnings and firmly fixed sun sails, it offers an unbelievable price / performance relationship. Compare it for yourself!

SHADEONE® an overview

- Can be mounted on almost any surface (e.g. on delicate façades of prefabricated houses)
- Sail has extremely good self-cleaning properties
- Dirt is not rolled up through the patented winding system
- Can be rolled in or out effortlessly
- Optimal rain protection by the waterproof membrane
- No water build-up as water runs off the membrane automatically when suspended at an inclination of 8 or more degrees
- Easy to install
- Also performs ideally under glass
- Width of up to 600 cm, extends to a length of up to 575 cm

Clear lines:

Sun protection and
architecture
enter into a perfect
symbiosis

"The best thing is that it's so easy to operate with the pull cord. You can have sun or shade, whichever you like, within seconds".

Alexander Seeger

The elbowed supports are available as an optional extra for use on balconies and railings

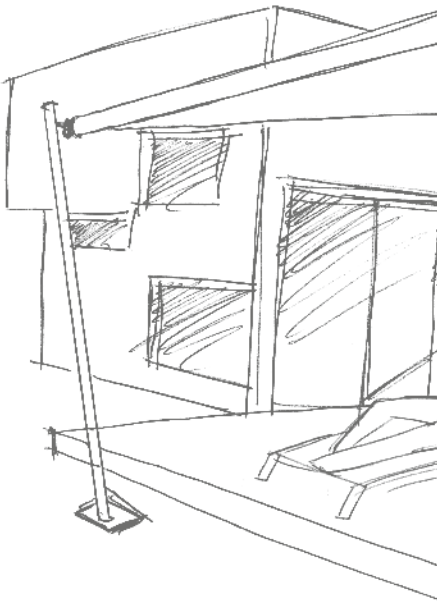
SHADEONE® in action on a terrace – a typical example

"We were on the lookout for a long time for a sun protection system which matches the modern, clear architecture of our house. We were won over by **SHADE**ONE®, not just because of the design aspect, but also because it's so fantastically easy to use."

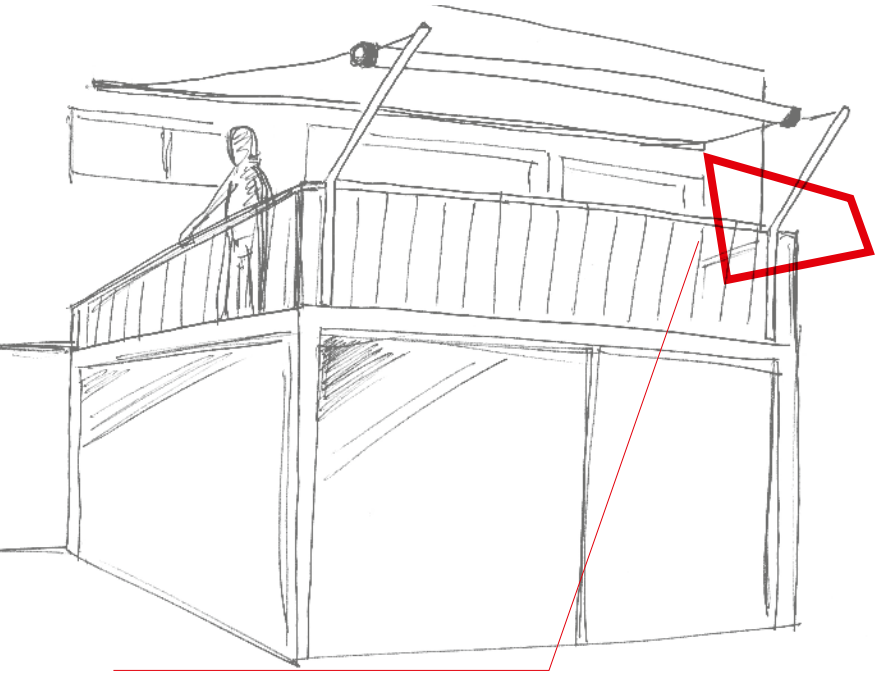
Astrid Thielemann

One system, many possibilities

Whether for terrace, patio, roof garden, outdoor dining areas, balcony, pool or courtyard, its modular construction means that **SHADE**ONE® can provide shade for almost any location. An extensive range of systems and accessories means a solution for almost every challenge.



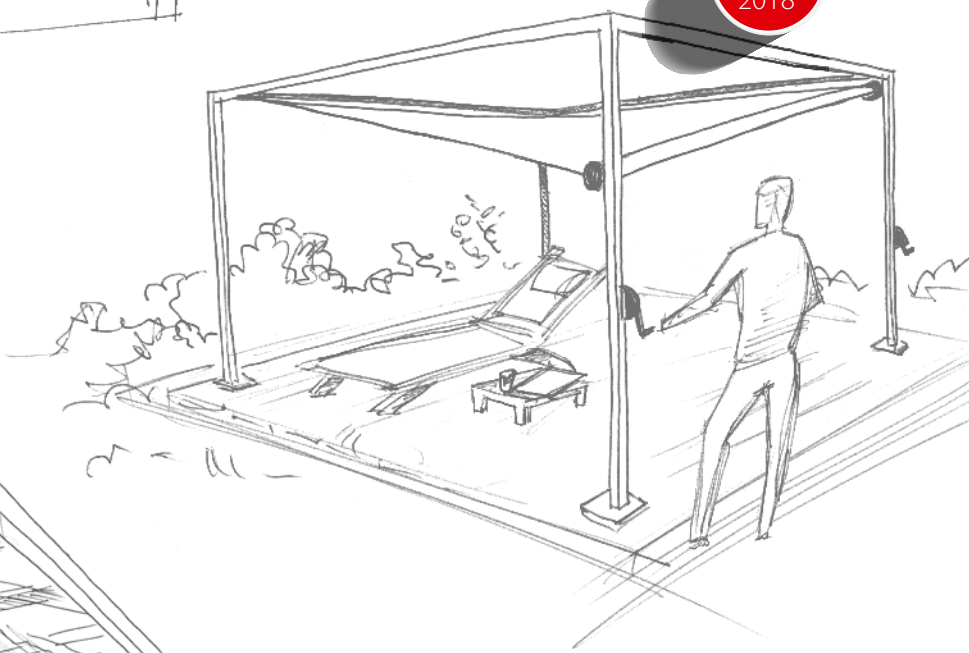
SHADEONE® | for railings and balconies

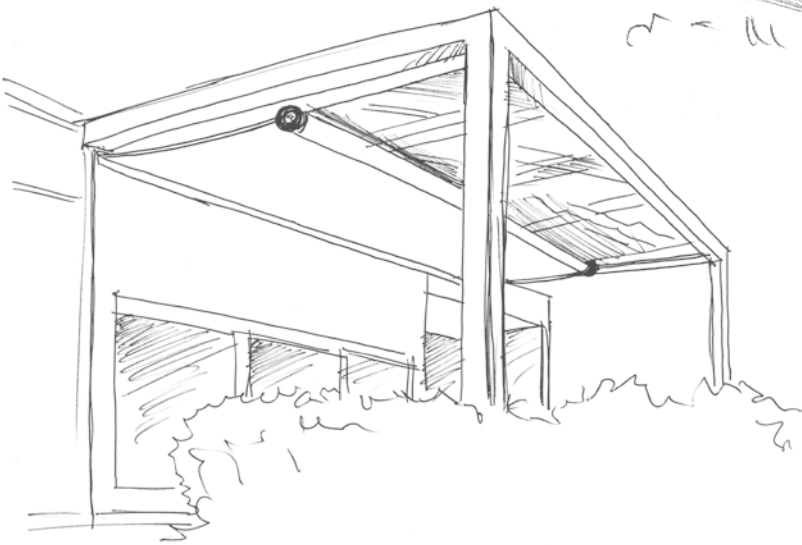


Through the elbowed supports, the extension length can be increased again when used on a railing. These are available as a custom-made product.

SHADECUBE® | free standing version as sun and rain protection

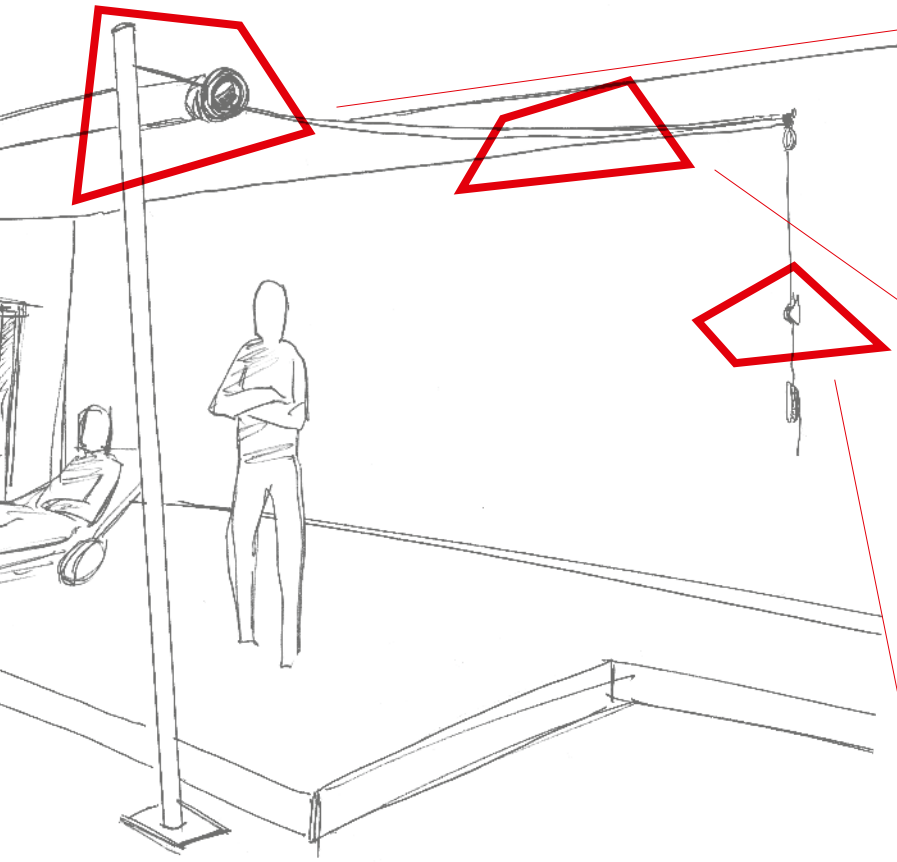
NEW 2018





SHADEONE® | as shade system for solutions under glass

SHADEONE® | for terraces and large spaces

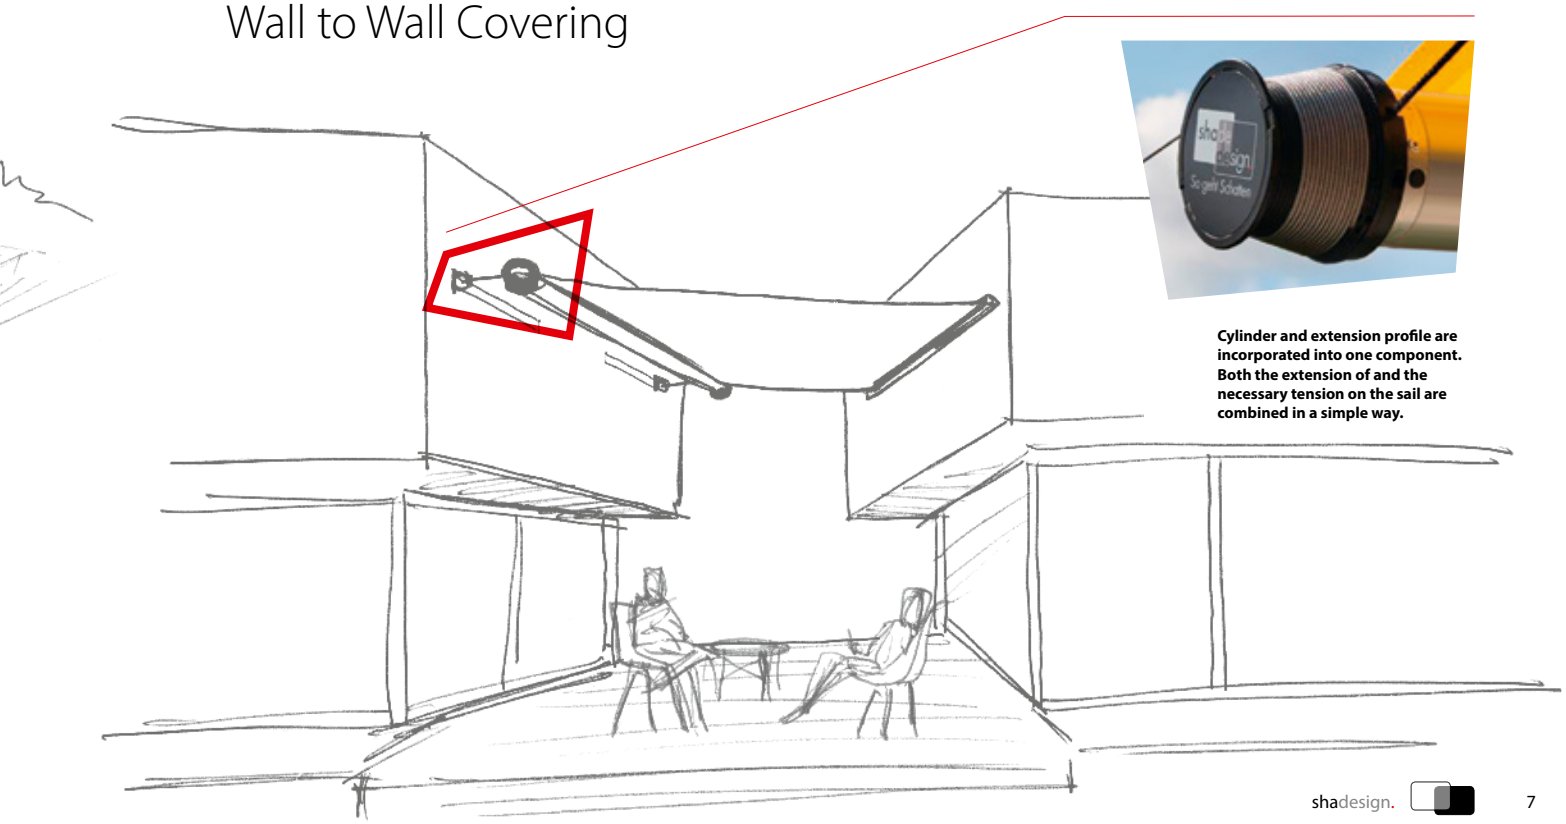


Flexibly mounted cylinder, cords and fabric screen stay taut in every position, no matter how far the screen is extended.

Minimal pull force and leverage on the wall means that the system is suitable for almost every façade. The cord clip allows the cord to be stopped easily.

An easy lock of the pull rope is enabled by the rope clamp.

SHADEONE® | Wall to Wall Covering



Cylinder and extension profile are incorporated into one component. Both the extension of and the necessary tension on the sail are combined in a simple way.

SHADEONE® **for use under glass**

SHADEONE® **offers ideal protection from rain and sun for outdoor dining areas**

“Finally - sun protection which draws your attention to its sail and not to its mechanisms”.

Stefanie Dreier

NEW 2018: SHADECUBE® **– wall mounting not necessary**

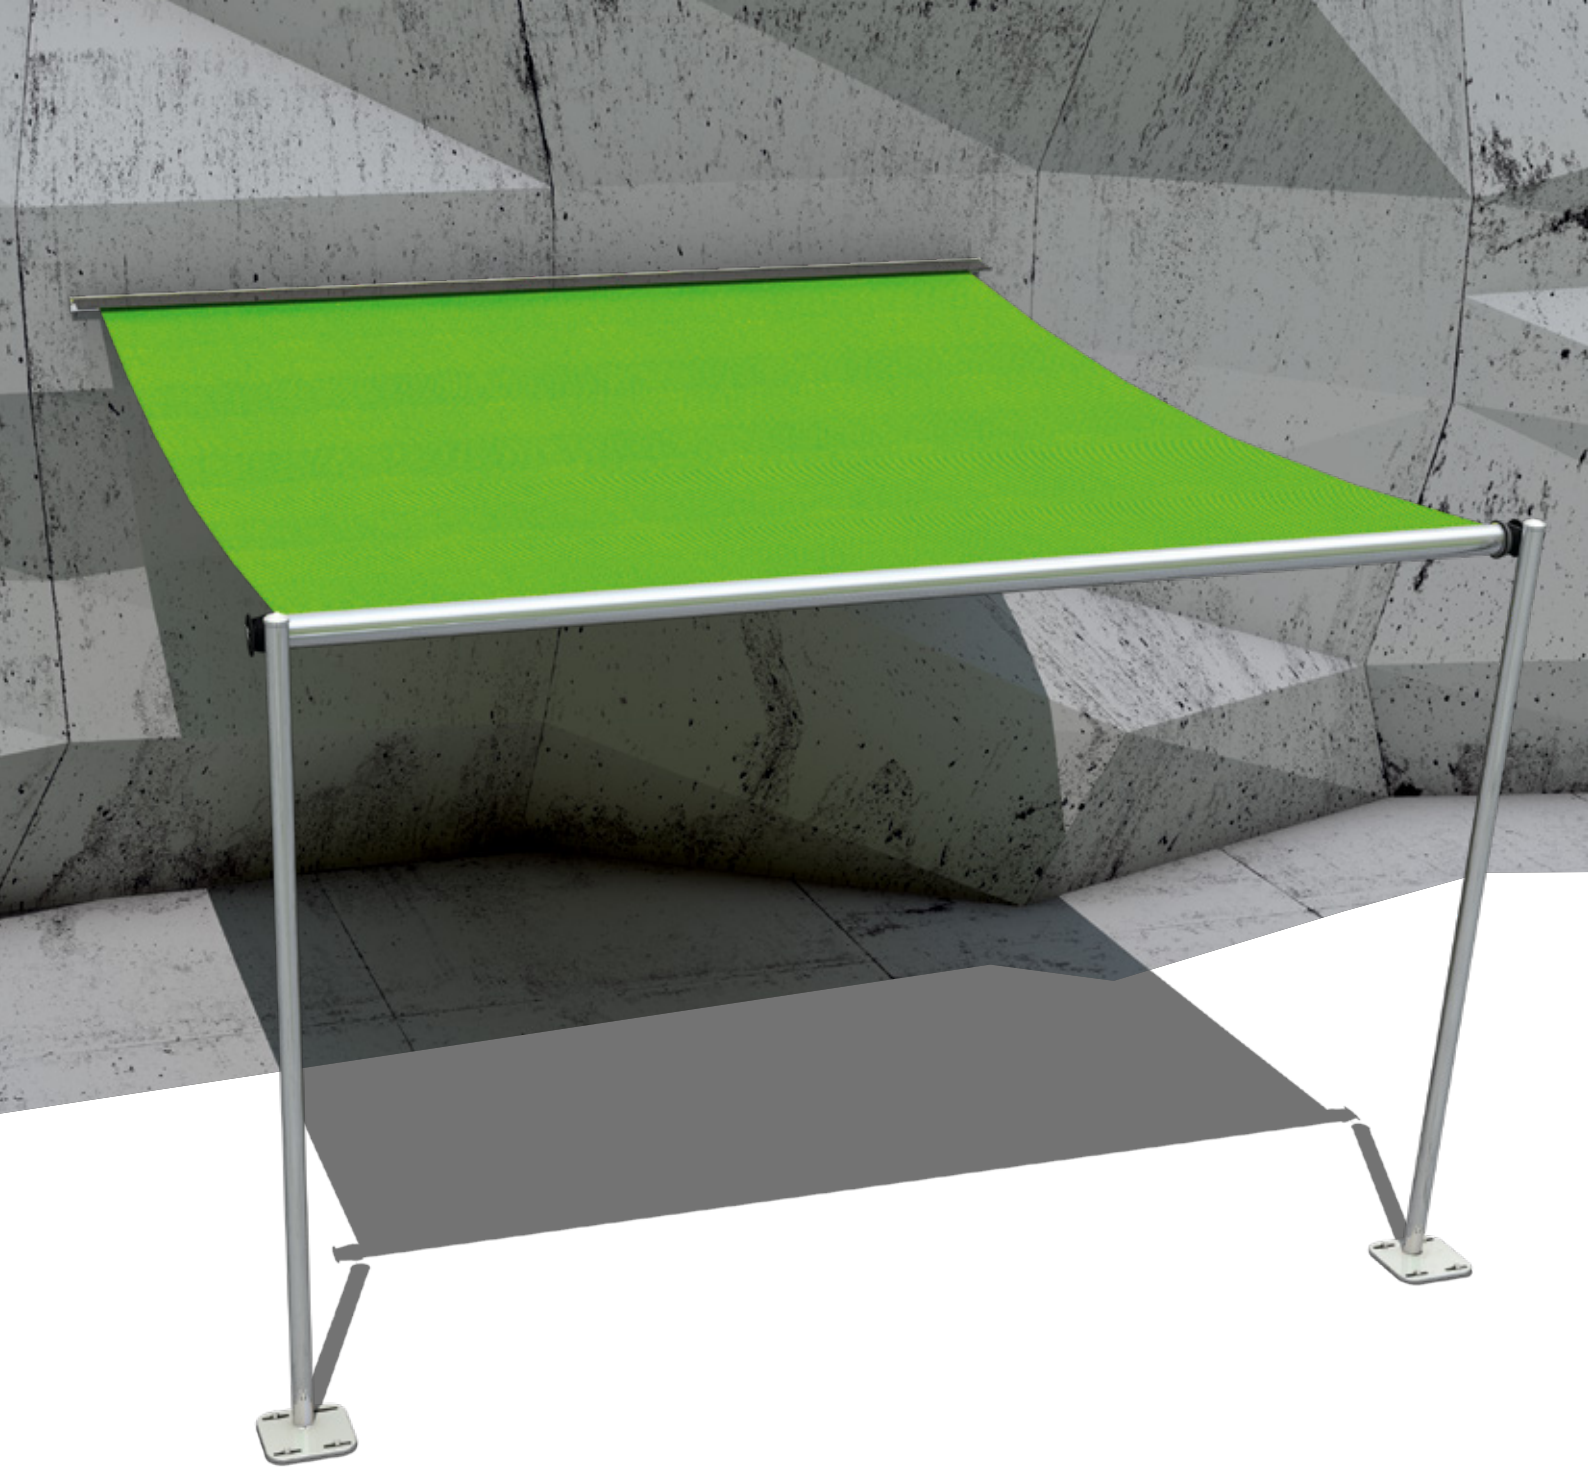
“Ultimately, what convinced me were both the innovative concepts of **SHADE**ONE® and the price.”

Christian Hanraths

It doesn’t just provide shade: SHADEONE® **blocks harmful UV rays with a UPF value of 50+.**

Smart shading solution:
SHADEONE® **Wall to Wall Covering**

SHADEONE® **INOX with height adjustable column**



SHADEONE® up close

The membrane was specially developed for the high demands of **SHADE**ONE®. The fabric screen is very light, impregnated with a mould-resistant substance, completely waterproof, dirt repellent and with its UPF value of 50+, offers a high level of protection against harmful UV rays. The UV stabilisation also ensures long-term tear-resistance and rich colours.

When the fabric screen is unrolled for the first time, a more or less defined, leaf structure can occur. This has no influence on the function or quality of the fabric and will disappear through after its first exposure to strong sunlight.
